

Procurement Bottleneck Analysis & Process Improvement

Company Profile

Company Name: NovaTech Manufacturing Pvt. Ltd.

Industry: Industrial Equipment Manufacturing

Location: Hyderabad, India

Employees: 850

Annual Procurement Spend: ₹120 Crore

Active Suppliers: 150

Business Problem

NovaTech Manufacturing Pvt. Ltd. has experienced a significant increase in procurement lead time over the past six months. The average procurement cycle has increased from 8 days to 18 days, resulting in production delays, increased procurement costs, and delayed customer deliveries.

Senior management has initiated a process improvement project to identify the root causes of these delays and recommend practical solutions to improve procurement efficiency.

Business Objective

The objective of this project is to identify procurement bottlenecks, analyze the root causes of delays, evaluate supplier performance, and recommend process improvements that reduce procurement lead time while improving operational efficiency.

Project Goals

- Identify bottlenecks in the procurement process.
- Analyse procurement performance using business KPIs.
- Perform root cause analysis.
- Recommend practical process improvements.
- Develop an interactive Power BI dashboard for management reporting.

Success Metrics

- Reduce procurement lead time.
- Improve supplier on-time delivery.
- Reduce delayed purchase orders.
- Improve procurement efficiency.
- Support data-driven decision-making.

Role: Junior Business Analyst

Responsibilities:

- Analyze procurement data.
- Identify operational bottlenecks.
- Build management dashboards.
- Recommend process improvements.
- Present findings to senior management.
